After building your plankton and getting them to hover in the water, answer the following questions. Please use complete sentences and give as many details and/or specifics so that your thinking process is evident.

1. Draw a diagram of both of your plankton.
2. How did you keep your plankton from sitting on the bottom or floating at the top?
3. Why do you think plankton don't float on the surface or sit on the bottom of the water column?
4. What are some ways that both phyto and zooplankton might use to move around the water column?
5. What are some ways that zooplankton might use to catch phytoplankton to eat them?
6. What are some ways that larger zooplankton might use to catch and eat smaller zooplankton?
